FORWORD

The publication of the INDEX TO THE 1850 FEDERAL POPULATION CENSUS OF OHIO was met with enthusiastic response by librarians in every genealogical library. Many report that anyone doing Ohio research consults this reference many times. This naturally resulted in the question, "When will there be an index to the 1860 Federal Census?"

Now we are offering a companion publication in exactly the same format as the 1850 Index. This is in two volumes because of the growth in population in that ten year period. In 1860 there were 2,338,281 persons listed in the Federal Census of Ohio.

As in the previous Index we have copied the name of the Head of the Household and any other persons with a different surname in that household. When there were several with the same surname, but differing from the Head of the Household, just the oldest of these was listed. If a parent of the Head of the Household, having the same last name, were living there, he or she was listed too, as that might be the name the searcher was looking for. This selection of the names in the Index resulted in 650,449 names in the Index.

Many dedicated genealogists assisted with this project and we are proud to offer this INDEX TO THE 1860 FEDERAL POPULATION CENSUS OF OHIO. Several counties were very difficult to read and these were proofed by another person and possible corrections made.

These date were put on computer tape, the tapes were then carefully examined for possible computer errors. All detected errors were corrected, then the tapes were letter sorted and printed by computer. We are please to offer this new aid to the genealogical searcher.

August 8,1979 Lida Flint Harshman

ACKNOWLEDGEMENTS

The undertaking of this INDEX was prompted by the many inqueries from users of the 1850 INDEX asking when an INDEX for the 1860 Census would be forthcoming. When this would be mentioned some of my friends thought it a fine project and volunteered to help with it. Others supplied names of persons who were interested in specific counties. The film was received in March 1978 and soon most of the counties were assigned.

I wish to thank all those who so enthusiastically endorsed and assisted with the project. All whose names or on this list join with me in presenting this publication.

Persons whose names are preceeded by an * have signified their willingness to answer letters about the counties which they copied.

Special thanks to my daughter, Cora Harshman Bartholow, for advising on the computer contract, to John and Patricia McKinsey for the computer work, to my granddaughter, Valerie Behrendt, for much of the detail work and typing here in my library and to Pamela Liptak for proofing the computer printouts. Without this assistance the project would not have been completed.

Lida Flint Harshman

HOW TO ORDER FILM FROM WHICH THIS INDEX WAS MADE

More persons are buying home viewers and may wish to order a roll of film from which this Index was made. This can be purchased from the National Archives (General Services Administration) Washington, D.C. Order must contain Microcopy number, roll number and name of County. Make checks payable to Cashier, National Archives (GSA) Washington, D.C. 20408

This Index is from Microcopy Number 653. Price per roll, set in 1977, is $12.00 per roll.

PLEASE READ THIS PAGE BEFORE USING THE INDEX

An * preceeding a name indicates that the name is questionable. Some pages had writing so faint that it is almost undecipherable. These, if copied, were preceeded by the *. Several pages in Belmont Countycould not be read, also some in Delaware and 3 Townships in Cuyahoga County.

The first two letters of the code represent the County.
The last two letters, or numbers, designate the Township or Ward within a city.

Example: HMCR = Hamilton County, Crosby Township.
HM11 = Hamilton County, Ward 11 in Cincinnati.

No County contained more than one city with ward designations. In 1860, fourteen counties had cities large enough to have ward designations:

Clark Co.	SPRINGFIELD	4 wards	Lucas Co.	TOLEDO	4 wards
Cuyahoga Co.	CLEVELAND	11 wards	Montgomery Co.	DAYTON	5 wards
Franklin Co.	COLUMBUS	5 wards	Muskingum Co.	ZANESVILLE	4 wards
Greene Co.	XENIA	4 wards	Pickaway Co.	CIRCLEVILLE	4 wards
Hamilton Co.	CINCINNATI	11 wards	Stark Co.	CANTON	4 wards
Jefferson Co.	STEUBENVILLE	4 wards	Washington Co.	MARIETTA	3 wards
Knox	MT. VERNON	5 wards	Wayne Co.	WOOSTER	4 wards

The number following the code refers to the page on the microfilm from which the names were copied. Stamped numbers were used for all but three rolls. No stamped numbers were found on Roll 953 of Cuyahoga County, only pencil numbers on every page. These were used. Gallia County was numbered with inked numbers on every page and Geauga County had pencil numbers on every page. These were used. All other numbers were stamped numbers which were on the extreme edge of alternate pages. Please search the page with the number and the page followingthat number for the name wanted.

Generally the writing was clear. A few census takers used fanciful capital letters and some were reluctant to spell out the name in detail, which resulted in some guess work on the part of the transcriber. These were preceeded by an *.

Phonetic spelling was quite common resulting in several variations in spelling of the same name. These were both used as is, as we have no way of knowing which way the family may have retained in using the name. Be alert to this and use every possible spelling in consulting the Index.

A map of Ohio is printed on the endpapers of these books to help the searcher find the location and full name of the Township designated by the code.

When the final printout was made it was discovered that about two columns of names had been punched one space over , resulting in these names being letter sorted and printed at the beginning of the Index. If you do not find your name in the proper place, check these names on page one.
